

FISHING GUIDEBOOK

THE IMPORTANCE OF THE OCEAN

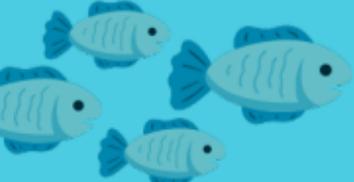

The ocean is home to a wide variety of plants and animals. People rely on the ocean and the habitat it provides in many different ways. If we want to continue to benefit from the ocean it is extremely important that we take care of it.

We are more connected to the ocean than you might think; Waste from our neighborhoods often travels to the ocean and creates pollution. This can harm the plants and animals that live there.

Along with ensuring trash doesn't end up in the gutter, one way we can take care of the ocean is through Marine Protected Areas. MPA's are specific areas in the ocean that have rules to protect the sea life from threats.

**WRITE OR DRAW YOUR OWN
IDEA FOR HOW TO TAKE CARE
OF THE OCEAN**

A large, empty white rounded rectangular box with rounded corners, intended for a child to write or draw their own idea for how to take care of the ocean. The box is centered on the page and occupies most of the lower half of the image. The background features a light teal gradient with stylized white and light blue clouds at the top and darker blue wavy shapes at the bottom representing the ocean.

ANGLER'S CODE OF ETHICS

Respect nature and your
place in it

Seek advice of experts

Show regard to spawning
seasons and juvenile fish

Do not waste. Take only what is
needed.

Keep people, property, and
resources safe

Obey laws and rules

Use proper gear and techniques

Pick up your trash

Share your catch
